

5 But they presented examples of expenses,
6 and for every example that they presented, I gave
7 them the detail behind it.

8 So, for example, one of the things that
9 they would have presented was an auto repair to
10 James' truck.

11 We have a \$25,000 deductible on our
12 insurance policy.

13 An employee was driving James' truck,
14 damaged it in the parking garage and we paid for it.

15 So we paid for it out of that account,
16 and they were like: "Well, why was this paid for?"

17 You know, it was because it was an
18 insurance claim. The damage was done by a church
19 employee and it was done in the parking garage. It
20 was a \$4500 bill or a \$5400 bill, whatever it was.

21 And I said, you know: "We were for
22 sure" -- "we would handle claims that were below our
23 deductible that were legitimate claims, obviously,
24 by paying out those claims."

Page 16

1 "Well, that's not the point."

2 All right. I mean, that was my sense of
3 the tenor, you know, of the meeting.

4 Q. So did it seem like these guys were out
5 to get James as opposed to getting legitimate --

6 A. I wouldn't want to --

7 Q. Let me finish my question.

8 A. Sorry.
